

Danish Julhjerter

Want to make these yourself?

1. Print the basic heart template from <http://www.mikkel.org.uk/ebygomm/crafts/danish-christmas-hearts/> onto two contrasting coloured sheets of A4 paper.
2. Cut along the black line to create 3 rectangular strips from each piece of paper
3. Fold along the dashed line
4. Then cut out along the lines to create a shape, consisting of a square with a semi circle at the end.
5. Cut along each black line to the line that runs along the top.
6. Unfold each shape, and refold so that the inside is now the outside so the printed lines will be hidden on the inside
7. Weave the strip from one side, between and then over the strips on the other side
8. Thread each strip in turn
9. Make sure the strips go through and over, not under and on top
10. As you get nearer the end, it gets trickier to thread the paper
11. The finished article, the final step is to attach a handle made of paper or string
12. The heart can be opened out and filled with sweets if desired or just hung on the tree
